CHAIRMAN'S LETTER

We are in a waiting mode right now. We have forwarded our questions and comments on the draft Request for Proposal (RFP) for the Management & Operating contract for the Savannah River Site to DOE and are waiting for their reply to our questions. DOE has started to answer questions submitted on the draft RFP but has not yet published answers to our questions on their website. We have been told that all of the questions would be answered by the end of February. We hope that we get a favorable response to our questions and that the RFP explicitly addresses the pensions and benefits of retirees. We forwarded a copy of our letter to the RFP Chair of the Source Evaluation Board to Senator Graham's office. His staff indicated that he would send a letter to DOE supporting our recommendations. Senator Graham has issued one letter addressing the draft RFP, but has not yet issued a second letter addressing our concerns.

We have not had any further communication from DOE Headquarters on Notice 351.1. As you may recall, Ms. Ingrid Kolb, Director, Office of Management, DOE Headquarters, met with members of the SRSRA Board in December and indicated that pensions and benefits for present retirees would be "grandfathered". (See article DOE Notice 351.1) We would like to see these verbal commitments included in a revised Notice scheduled to be reissued in June of 2007, or have a letter indicating DOE concurs with the interpretation of the Notice given

by Ms. Kolb. Ms. Kolb indicated in December that DOE would request formal comments from stakeholders. We have not been contacted and are not aware of a procedure being in place for submitting these comments. We are preparing SRSRA comments so that we can reply quickly to DOE's request for comments.

As stated in our bylaws, one of the purposes of our organization is "to support, promote and assist in the growth and development of the Savannah River Site." We recently had an opportunity to show our support of the Site when, on February 15, Mike French, First Vice-Chairman of the SRS Retiree Association, made a presentation at a DOE public meeting in North Augusta. Mike also prepared a letter from the SRSRA in support of DOE's Global Nuclear Energy Partnership. In the presentation and letter he advocated selection of the Savannah River Site as the location for a new prototype commercial nuclear fuel recycling plant and a new design commercial nuclear power reactor that would burn recycled plutonium and uranium and actinides from spent fuel. This program, if implemented, has the potential to increase the available supply of fuel for nuclear power; significantly reduce the amount of waste that would eventually go to a repository such as Yucca Mountain; and reduce the likelihood of nuclear weapons proliferation. I think that this is an exciting concept, and I am pleased that the SRSRA was able to support the meeting. We believe that SRS would be the best location for the prototypes.

We have set the date and location for our 2007 Annual Meeting. The meeting will be held on Tuesday April 10, 2007, in St. Angela Hall located on York Street just north of Park Avenue near downtown Aiken. St. Angela Hall was selected to accommodate the larger crowd we anticipate for our meeting that is occurring during the SRS contract rebid. We plan to have Board members available during the meeting to answer any questions you may have about the potential impact on your pension and benefits that could result from the RFP and Notice 351.1. Mark your calendars and plan to be there. Your attendance shows members of our congressional delegation and DOE that you support the efforts of the SRSRA to protect your pensions and post-retirement benefits.

Nick Kuehn, Chairman
Savannah River Site Retiree Association

SRSRA Summary Recommendation on Request for Proposal (RFP) for SRS Operation

SRSRA proposes that the successful bidder for the SRS contract retain all current pension and benefit plans at SRS for both retirees and active employees. This proposal meets DOE objectives, is cost effective, and SRSRA believes it is in the best interests of retirees and active employees.

DOE Notice 351.1

On December 6, 2006, Ms. Ingrid Kolb, Director, Office of Management (DOE-HQ), presented to the SRSRA key points that helped alleviate concerns which SRSRA Board members had with the DOE Policy announcement related to Notice 351.1.

Ms. Kolb announced that the policy under N 351.1 "Grandfathers" all employees hired before March 1,

2007, for pension benefits and those hired before July 26, 2006, for medical plans. Those “grandfathered” do include current retirees.

- Ms. Kolb stated that it was **NOT the intention of N 351.1 to end future pension adjustments as allowed under the WSRC Team Plan.**
- Ms. Kolb stated that pre-1998 free Standard Medical for retirees is a “done deal” and is not expected to be changed. She stated that the benefit coverage ‘augmentation’ definition would NOT exclude future medical technology advancements from being acceptable costs under the current medical provisions.

Your Board thinks that Ms. Kolb’s answers to our concerns with the DOE N351.1 policy announcement are most satisfactory.

The SRSRA Board of Directors current position is that the DOE Policy N351.1 needs to be amended to clearly reflect statements made by Ms. Kolb. As N 351.1 is currently written, one cannot directly derive the “DOE intentions” as stated by Ms. Kolb. Actions underway by the SRSRA Benefits Committee are directed toward obtaining a clear policy statement that would not be subject to different interpretations and altered ‘DOE intentions’ at some point in the future.

Global Nuclear Energy Partnership (GNEP) Information

The GNEP is a comprehensive strategy, sponsored by DOE, to “increase U.S. and global energy security; reduce the risk of nuclear proliferation; encourage clean global development; and improve the environment”. Nuclear power is the only proven technology that can reduce the use of fossil fuels while providing abundant reliable supplies of base-load electricity without air pollution or emissions of greenhouse gases.

GNEP will develop and demonstrate advanced recycling reactors, or advanced fast reactors, as a key element of a new, integrated U.S. recycling capability. As they produce power, advanced fast reactors will consume transuranic elements – plutonium and other long lived radioactive materials – potentially eliminating or greatly reducing the need for their disposal in Yucca Mountain, Nevada. As part of GNEP, the U.S. is moving from a current, once-through reactor cycle to an improved approach based on recycling of spent nuclear fuel. Specifically, recycling would employ advanced, new fuel separations technologies.

DOE is evaluating three major fuel cycle facilities to support GNEP, namely:

1. **A Nuclear fuel recycling center** that would separate spent fuel into reusable uranium and transuranics and non-reusable constituents without separating pure plutonium. In addition, fuel will be fabricated from transuranics for use in an advanced recycling reactor.
2. **An Advanced recycling reactor** which will destroy transuranics while generating electricity. The proposed technology is a sodium-cooled fast reactor with power ratings from 250-2,000 MWth.

These 2 facilities could be privately owned and operated with government supplied incentives or other involvement yet to be determined.

3. **An Advanced fuel cycle research facility** to support research and development relating to separation technologies, fabrication of fast reactor transmutation fuel, and long-term R&D of advanced fuel cycle technologies. This facility would be built and operated at a DOE site.

The GNEP site alternatives will be assessed in a Preliminary Environmental Impact Statement (PEIS) to determine potential locations for the various facilities. Thirteen sites are being evaluated, eight at DOE Sites, including SRS, and five non-DOE Sites, including a facility at Barnwell, SC. – Interesting! The GNEP meeting discussed in the Chairman’s Letter was to get inputs from political representatives and members of the public for consideration in the PEIS. There were over 90 people who spoke at the meeting, the vast majority in favor of the program, and some recommending that all three facilities be located at SRS, thereby saving large costs and minimizing movement of nuclear materials off Site.

The SRS team is headed by the Economic Development Partnership, together with the Washington Group and the French company AREVA with Ernie Chaput as the Project Manager. The Barnwell team is headed up by Energy Solutions. Both S.C. teams have received some funding from DOE for PEIS work and other proposed programmatic requirements.

SRSRA Annual Meeting

TIME TO MAKE YOUR ARRANGEMENTS FOR THE SRSRA ANNUAL MEETING.

Date: **April 10, 2007**

New Location: St. Mary’s Parish Hall (St. Angela Hall) located in the 100 block of York St, Aiken, SC. **Ample parking available on York Street and Fairfield Street.**

Time: Program starts at 1:00 P.M. Renew acquaintances from noon to 1:00 PM. Refreshments will be available.

New feature: There will be a drawing for \$500 in door prizes at the conclusion of the program. **You must be present at the drawing to claim your prize.**

Name Badges will be issued for each 2007 SRSRA member attending the meeting. **Obtain your name badge as you enter the facility to qualify for the door prize drawing.**

Program Items:

- INTRODUCTION OF GUESTS.
- KEY NOTE SPEAKER

- BREAK
- SRS RFP UPDATE WITH EMPHASIS ON POTENTIAL IMPACT ON RETIREE BENEFITS.
- YOUR SRSRA BOARD AT WORK
- AMMENDMENTS TO SRSRA BYLAWS FOR MEMBERSHIP APPROVAL
- ELECTION OF SRSRA BOARD MEMBERS
- OTHER MATTERS OF INTEREST TO THE MEMBERSHIP
- DOOR PRIZE DRAWING

Pensions and COLA Question

In response to the frequently asked question: "Why don't retirees get a COLA on their pensions?", the following information is provided.

The WSRC Pension Plan is a qualified plan under the Employee Retirement Income Security Act (ERISA). This Act requires that all qualified plans have an approved Plan document that establishes the terms and conditions that applies to all participants in that qualified plan.

NOTE: ERISA also includes a provision that requires all qualified plans to conduct non-discrimination tests to make sure that highly compensated participants do not receive favored treatment in comparison to non-highly compensated participants in a plan. Failure to pass a non-discrimination test would place the plan in non-compliance.

A Plan document contains the terms, conditions, and benefits for Plan participants. This includes multipliers, benefit formulas, credited service requirements, types of retirements, types of forms of benefit payments, etc. For example, the WSRC Plan includes a provision that qualifies participants with 15 years of pension plan credited service to participate in the Medical Plan. Pension plan administrators cannot modify or change the provisions of a qualified Plan without first amending the Plan with ERISA.

The WSRC Plan, which is a clone of the DuPont Plan, has no provision for cost-of-living adjustments (COLAS). Therefore, the WSRC Plan would have to be amended to provide a pension adjustment. This is common for private sector plans where it is rare to have provisions for COLAS; however, COLAS are more commonly found in public sector plans, i.e., state, federal, and local government pension plans. Public sector entities have the ability to raise taxes to pay for the cost of COLAS as compared to private sector industries i.e., airlines, steel, auto etc., firms that have had difficulty or are unable to fund their pension plans. The WSRC Plan is considered a private-sector plan.

If the administrators of a qualified plan desire to grant an ad hoc pension adjustment, they must submit an amendment to the Plan with ERISA. This submittal must include a statement that covers financing and an assertion that the adjustment meets the non-discrimination test criteria. When the SRSRA was successful in obtaining a pension adjustment a few years ago, Senator Graham obtained additional Congressional funding to

cover the cost of that adjustment. The WSRC plan was amended in 2002 to specifically permit that pension adjustment which provided a COLA to participants that had been retired for 3 or more years.

Since that adjustment, there have been a number of events that have occurred which have made it much more difficult to obtain a pension adjustment. First, the stock market slump of 2000-2002 resulted in Plan investments not achieving forecasted returns. This resulted in the under-funding of the Plan. In 2006, Congress passed new pension protection legislation, in response to a number of companies defaulting on their plans. This act requires pension plans to reach 100% of their actuarial funding liability by 2011 on an accelerated schedule. It also requires that before 2011, plans achieve an ever increasing level of funding prior to plan improvements, such as COLAS. Retirees at Oak Ridge (OR) have been pressing for a pension adjustment, but it was recently denied by DOE. This rejection occurred even though the OR Pension Plan is over-funded by more than \$300M. By contract, DOE has always had approval authority for employee and retiree benefit costs for all DOE contractors.

In summary, **WSRC was the last Site in the DOE complex to receive a retiree pension adjustment because of SRSRA initiatives and the strong support of Senator Graham.** In order for WSRC retirees to receive another pension adjustment, the followings events must happen:

- DOE must provide the millions of dollars of funding necessary to fully fund the WSRC Plan at 100% by 2011. Note: in 2006 DOE provided substantial funding which allowed WSRC to increase the funding level of the pension plan to 82%.
- Once the 100% level has been attained, the Site Contractor must manage the investment of pension plan monies effectively to keep the funding level at or above 100%. Any stock market downturn has the potential to increase the amount necessary from DOE to meet the accelerated funding schedule. Note: WSRC pension plan investments earned 12.5% in 2006 beating their investment target of 8.5% by 50%.
- The SRSRA and other DOE contractor retiree organization must successfully lobby DOE to approve pension adjustments for contractor plans that meet Federal funding requirements. Congressional help will be required to convince DOE to allow any pension adjustments. Note: DOE will not use the term "COLAS" since that has the connotation that there is a commitment for future adjustments.
- After all of the above conditions have been met or resolved, the SRSRA must convince the Site contractor a pension adjustment is warranted and help the contractor obtain DOE approval. More than likely, Congressional help will be needed to obtain this funding.

MEMBER QUESTION ON SECURITY OF PENSION

Member Question: [ed. In reference to IDAHO site where there have been numerous contractor changes but never a pension issue in this member's recollection.] "I recall reading somewhere that it's illegal for a company to just stop pensions for 'previous' [ed. retired] personnel; that money has to be accounted for. Any new news on this?"

SRSRA Answer: The Idaho contractor pension plans, as well as the WSRC pension plan, are qualified pension plans sponsored by private companies and are covered by the Employee Retirement Income Security Act (ERISA). This Act requires that all qualified plan sponsors pay annual premiums to the Pension Benefit Guaranty Corporation (PBGC) for each participant in order to buy insurance against potential default of their

plan. Currently participants in these PBGC insured pension plans are guaranteed their pensions up to a maximum of \$4,125 per month for a participant that retires at age 65.

However, participants in pension plans that are sponsored by DOE prime contractors have an additional protection through the contracts between these contractors and DOE. These contracts commit DOE to fund the contractor's pension plan for service performed under the DOE contract. This commitment continues as long as the participant is a contractor plan sponsored under a DOE contract. As a result of this contractual relationship the Government, through its agency (DOE), is responsible for funding these pension plans.

In summary, DOE contractor pension plans have two levels of protection and are generally considered quite secure.

SRS ACTIVITIES

SRS Budget Information

The FY2007 budget has undergone last minute adjustments as congress finalizes the budget. Per the SRSRA's present information, the Savannah River Site's FY 2007 requested budget is \$1,632 billion, approximately \$55M (3.3%) less than FY2006. This budget is in conformance with the President's budget submittal. The proposed budget reflects decreases in Environmental Management (EM) (- \$81 M) and Defense Programs (- \$14M), increases in defense Nuclear Non-Proliferation (+ \$9M), Safeguards and Security (EM) (+29M) and Safeguards and Security (NNSA) (+2M), with other programs remaining at FY 2006 levels. These figures may be updated in the next few weeks and do not include any potential funding for MOX. The final FY2007 budget will be published in our next newsletter.

SRNL Audit

In January, the Savannah River National Laboratory passed an audit by the National Institute of Science and Technology and is now qualified to perform calibration work for the US Department of Homeland Security. Through the audit certification process, SRNL's Health Physics Instrumentation Calibration Laboratory has achieved "accreditation status" for ionization radiation under the National Voluntary Laboratory Accreditation Program.

Legacy of Stars Award

The Washington Savannah River Company was recently recognized by the Department of Energy for earning the DOE Voluntary Protection Program Legacy of Stars Award, culminating six years of "Star Status" achievement. This is the highest level of safety recognition in that program. In order to receive a Legacy of Stars Award, a contractor must earn the Star of Excellence Award for three consecutive years. In order to receive the Star of Excellence Awards, WSRC had to maintain their injury rates at least 75 percent below industry averages; maintain a safety program excellence worthy of emulation; and initiate outreach and mentoring activities to promote safe operations throughout the community. WSRC was recently recognized by Occupational Hazards magazine as one of the twelve safest companies in America.

National Engineers Week / Technology Days

As part of National Engineers Week, SRS sponsored Technology Days 2007 in February at the National Science Center's Fort Discovery in Augusta, GA. Technology Days is designed to interest middle school students to pursue careers in science, technology, or engineering fields. Approximately 50 interactive exhibits ranging from glassblowers to earthquake monitoring and robotics were presented.

MEMBERSHIP

Our membership at this point in 2007 is over 700. If your friends have not renewed for 2007, now is the time to remind them to join us! If they were members in 2006, they should have received an email or letter recently with a 2007 membership form attached. If not, hook them up to our website, or have them use the membership form in this Newsletter. Remember---the larger our membership, the louder our voice with the Site Contractor, DOE, and Congress! **Join SRSRA NOW! You won't find a better value for your \$15.00 dues!**

NEWSLETTER MAILING

We still experience incorrect e-mail addresses and bounced communications to our membership. A number of e-mails have been returned for incorrect addresses; recipient mailbox over quota; recipient not accepting mail from SRSRA; and several others indicating that our database needs some "tuning up". If you have an active e-mail address, or have changed your address recently, and are not receiving SRSRA communications by e-mail, please contact membership@srsretirees.org. During 2006, our e-mail program allowed us to reach 650+ out of 958 members more quickly with news like the concern about lost Medical Enrollment Forms. Other pluses are quicker distribution of the Newsletter and less cost of copying and mailing hard copies. Thanks to all of you who are receiving your Newsletter by e-mail.

SRSRA WEB SITE

WHEN IN DOUBT, LOOK TO THE SRSRA WEB SITE!! The SRSRA web site is intended to be a useful source of current information. Let us know if it is -- or is not -- meeting your needs!

We are continuing to revise, restructure, and update the web site. If you have found useful links pertaining to any aspect of our focus on Retiree Benefits that are not already on our web site, please tell us so that we can add them to the site. Just send an email to: webmaster@srsretirees.org.

A new page has been added to the web site, titled "**Kudos From Members**". Over the years we have received many letters and emails from members who felt that the SRS Retirees Association had helped them tremendously. We are delighted to receive such letters and want to share some of the comments with all members. Check out this new page at <http://srsretirees.org/kudos.html> We look forward to serving you in the future. Please write; keep those cards, letters or email coming; and we will post them on our web site so other

members will know what you found helpful. When appropriate, we will address member questions in the Newsletter for the benefit of all members who may have similar concerns or problems.

In addition, a new SRSRA Membership Form for 2007 is available on the web site.

BOARD MEETING DATES, TIME AND LOCATION

The SRSRA Board of Directors is now meeting at 10:00 A.M. in the Conference Room at Eden Gardens off Silver Bluff Road near Woodside Executive Park. The upcoming 2007 meetings held at this new location will be on March 27, May 1 and June 5. There are two meetings in March in order to prepare for the SRSRA Annual Meeting on April 10, but no BOD meeting in April. **The meeting location has changed for 2007, but the time remains the same.** Association members may attend and participate, but may not vote on Board issues. If you ever plan to attend a meeting, be sure to contact a BOD member to confirm that the meeting date and time has not changed. **BOD meeting dates are also listed on the website.**

TREASURER'S REPORT - Stan Smith, Treasurer

The following summarizes financial activities for fiscal year to date (July through January).

Opening Balance	\$25,042
Income	10,887
Expenses	3,419
Closing Balance	\$32,511

The income includes \$487 interest from a CD. The remainder of income is from membership dues. The main expense items since the last Newsletter are supplies for the Membership and Newsletter Committees; Newsletter printing; and prepayment for the 2007 annual meeting room. The closing balance includes \$20,000 in CDs.

ORA

The ORA's offsite Web page includes the same information that is available on ShRINE. From your home computer, go to: www.srs-ora.com. You will have access to many ORA related items.

Error in New Medical Care Booklet

In the new, 2007 booklet on Medical Care, there is an error in the table on page 13. Specifically, for Standard Choice, the Annual Deductible for Individual and Family for a Non-Network Provider is shown as half of that for a Network Provider. Both the Network and Non-Network Providers have the same deductible amounts, \$400/\$800 for Individual and Family. A correction will be issued by WSRC Team

PROPOSED CHANGES TO SRSRA BYLAWS

The following are two amendments to the SRSRA Bylaws. These recommendations will be proposed to the membership at the Annual Meeting in April. **The Board of Directors for the SRSRA endorses these two amendments and recommend their approval by the membership at that time.**

Amendment 1

ARTICLE VI – Officers

Section 1 Executive officers. Executive officers of the Corporation shall be: Chairperson, First Vice-Chairperson, Second Vice-Chairperson, Third Vice-Chairperson, Secretary, and Treasurer. The Board of Directors shall elect the executive officers from the board members.

Section 2 Duties.

(d) Third Vice-Chairperson. The Third Vice-Chairperson shall assume the duties of the Chairperson in the absence of the Chairperson and the First and Second Vice-Chairpersons. The Third Vice-Chairperson is responsible for information and communication for the organization.

Change subsection (d) to (e)

Change subsection (e) to (f)

EXPLANATION FOR PROPOSED CHANGE

The Editor of the SRSRA Newsletter is highly involved in all aspects of SRSRA business, and the Board recommends that position should be recognized as the Third Vice - Chairman.

Amendment 2

ARTICLE IV – Board of Directors

Section 2. Composition. The Board of Directors of the Corporation shall consist of not less than twenty (20), nor more than thirty (30) members. The Board members shall serve two-year terms (or until the date of the second annual meeting after their election) and are eligible for re-election. The terms of the membership of the Board of Directors shall be staggered so that one-half of the members are elected each year. The Board of Directors shall be elected from among the corporation members.

The Board of Directors may appoint temporary board members to fill vacancies that occur during the year to serve until the next annual Corporation meeting.

EXPLANATION FOR PROPOSED CHANGE

Past SRSRA annual meetings have been held the same month each year. This year, however, the annual meeting is being held in April instead of March. This Bylaws change will allow serving members terms to be extended until new elections can be conducted at the annual meeting.

SRSRA Medical Interface Committee

1. The Medical Interface Committee has a new email address. An email to this address will reach the entire Medical Interface Committee. Please let us know if you have problems that you have experienced, or solved, and we will alert other members to this problem. medicalbenefits@srsretirees.org

2. **Note to out-of-state members:** In 2006, BCBS reimbursed claims were based upon South Carolina's rate structure, rather than the state in which the retiree lived or was treated. The result was that some of the reimbursements were not correct, and were probably too low.

This has been corrected for 2007. **However, anyone who had such claims will need to contact BCBS to get the reimbursement corrected. They will not automatically correct the 2006 reimbursements. Out-of-state retirees must contact BCBS directly to start the process to correct their reimbursements.**

3. BCBS representatives will be at the SRSRA Annual Meeting and will have internet access to try to resolve complaints at the meeting. However, in the event that such resolution cannot be achieved at the meeting, members should also bring copies of all pertinent information so that the BCBS representatives can take the papers back with them to Columbia for further investigation. This has been a great service to members; and in the past, they have found it extremely helpful. If you have any concerns about claims or reimbursements or any BCBS problem, please take advantage of this opportunity.

BC/BS SERVICE CONCERNS

We have many letters from retirees trying to get proper Blue Cross/Blue Shield reimbursement for their medical bills. Most of the problems occur when the retiree/patient lives out-of-state (i.e., no longer in SC). If you have records of BC/BS service problems to share with SRSRA members, please **send a letter outlining your case to both:**
